The LED Technology To Offer A Real Game Changer Service

LEDs are a far superior technology than previous fluorescent “pink tubes”

Advantages respect fluorescent emitters:

- Focus and efficiency

With fluorescent technology the emission is a broad band around 630 nm. LEDs emit only on the wavelength that have biological effect. The Collagen Effect will be far more visible and effective. Younger Skin with better result in less time.

- Consumption

The entire LED part in LED Hybrid takes a consumption of about 240 watt. A 8 times increase in energy efficiency.

- Duration

LEDs life is about 15000 hours. Fluorescent usually 800/1000. You won't have to change LEDs. Never.

PhotoBioModulation Collagen ONLY mode for a Real Beauty Treatment

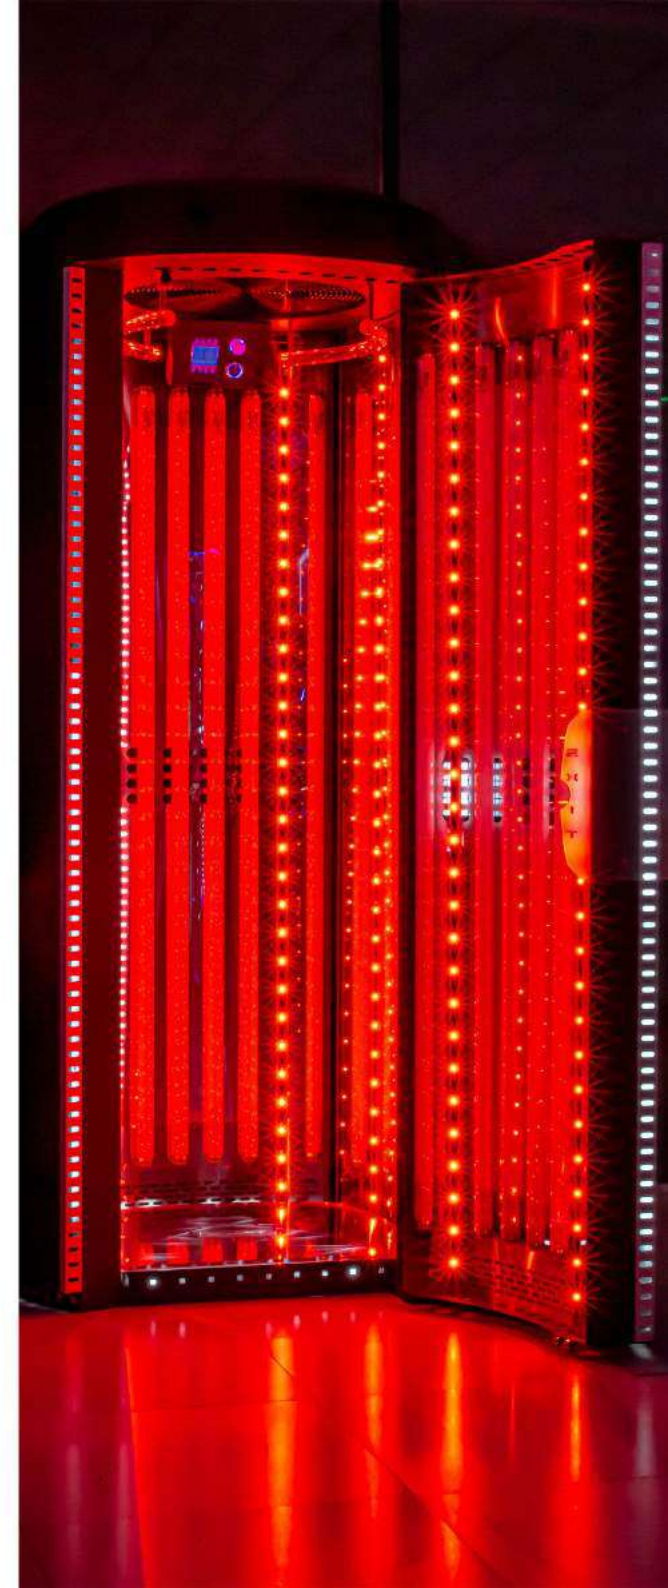

You want to make a COLLAGEN ONLY treatment?

Yes, You Can!

Thanks to the innovative electronic managing of Smart Solarium, you will be able to set the machine as Collagen (PhotoBioModulation) Only MODE.

*Only RED Light LEDs will turn on. You will be able to make a **longer session**, focused on Collagen Stimulation, to get the **best result**.*

*All with a consumption of **just 300 watt**.*

Fine Details. For a Real Deluxe Experience

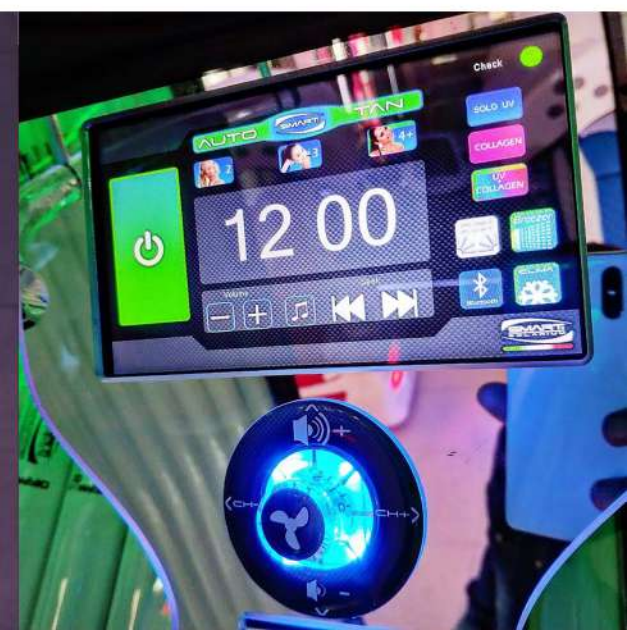

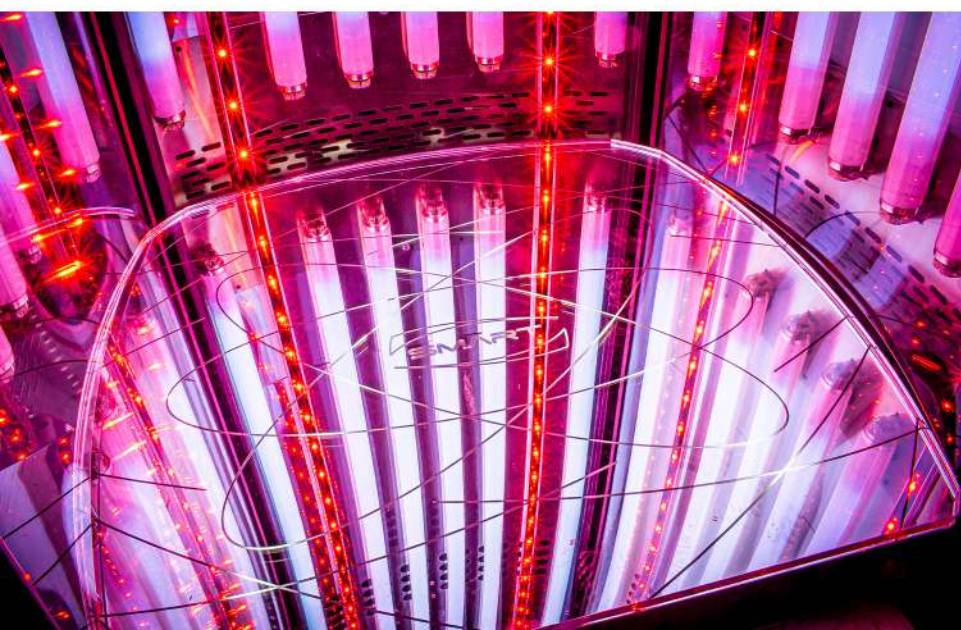

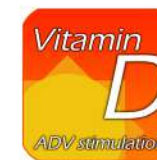

Enjoy your music with the **bluetooth connection**, and keep track of the session and time with the **on-board computer**. Stimulate the production of precious **Vitamin D**, thanks to the focus on UVB.

UV Commander Touch, the most Advanced Touchscreen Interface can be found on a tanning device. Easy to use, yet powerful and with a stunning design, make the device easy to use and easy to maintain thanks to the automatic check of the machine status.

Breezer Water Technology with Hyaluronic acid

A fresh session full of comfort, thanks to the Breezer technology allows for a fantastic tanning experience, with no heat and better tan. But it is not over, we also added hyaluronic acid to increase skin softness and have a better look after session.

Look Great, Feel Great, with this fine **Made in Italy** device.

Specs

Typical session time:	14 minutes
LED:	240
Peak Power Irradiance:	153 mW/cm ²
Wavelength Emission:	633 nm
power for LED:	1 Watt
Total Power:	4590 watt
Voltage:	220 V
Plug:	32 amp tripolar
FAN:	500 mm

Size and Weight

Width:	110 cm
Depth [door open]:	165 cm
Height:	235 cm
Weight:	400 kg
