

Say Goodbye To Cellulite!

**VacuLife®**

**VacuLife Dual Professional**

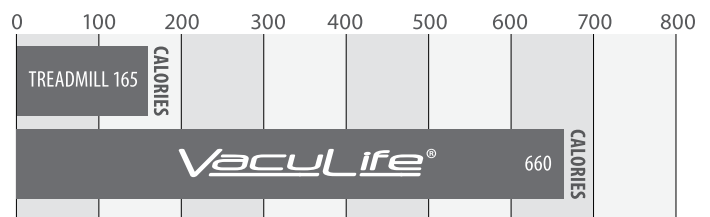

VacuLife is a technology based on the unique combination of vacuum and infrared radiation, designed for both men and women. It supports spot reduction, i.e. it targets those body parts where fat is most likely to be stored: the pelvic region, the lower limb and the abdomen. It reduces fat tissue stimulating the natural action of metabolism by means of vacuum or infrared radiation. Used regularly, improves body shape and reduces cellulite.

TECHNICAL SPECIFICATION	
Length / width / height	253/89/170 cm
Weight	200 kg
Power Consumption	2500 W

It has been proven that during 30 minute workout on a treadmill closed inside the VacuLife capsule, with an average speed of 5kph and 10% incline, calories are burnt up to 4 times faster in comparison with a conventional half hour treadmill workout.

## The sauna effect

Thermal devices emit infrared radiation which penetrates the skin to a depth of four centimeters and is easily absorbed by the body. Infrared rays warm the body and dilate blood vessels. This process cleanses the body of harmful toxins accumulated within deep tissues. Training on the VacuLife thermal devices makes the skin firm and healthy by cleaning both the skin and the subcutaneous tissues of harmful toxins. Furthermore, excellent results are achieved and the body weight is reduced.

## Walking in vacuum

Vacuum devices use the pressure technology to a safe level in order to improve blood circulation, boost metabolism and burn fat, which results in accelerated weight loss and significant cellulite reduction. This method burns fat tissue four times faster than a normal process and results in long-term effects.
